Hiring Manager
Brady Corporation
Plymouth, MN

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer Intern position at Brady Corporation's Plymouth, MN office. As a junior pursuing a Bachelor of Science in Computer Information Science at St. Edward's University, I have developed a strong foundation in object-oriented programming, software development, and data analysis, which aligns well with Brady Corp's need for a dynamic and motivated intern.

During my recent internship with The Nature Conservancy (TNC), I honed my skills in software development and data analysis, using Python and other tools to manage and analyze geospatial datasets. I have experience working with object-oriented programming languages such as C++ and Java and am eager to further expand my skills by learning C# in Brady's collaborative environment. My coursework and hands-on experience have also instilled in me a strong understanding of development best practices, code review processes, and debugging techniques, which will allow me to contribute effectively to your software team.

I am particularly drawn to Brady Corp because of its commitment to innovation, safety, and productivity across diverse industries. I am excited about the opportunity to work in an environment that fosters growth, encourages collaboration, and values employee contributions. I am confident that my technical skills, eagerness to learn, and passion for developing high-quality software will make me a valuable addition to your team.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to Brady Corporation's continued success.

Sincerely,
Zaayan Javed
